Delivering Data-Driven Insights & Scalable Cloud-Native Solutions
Kenya

Summary

I am an AWS Cloud Certified professional with extensive hands-on experience across major cloud platforms, including AWS, Google Cloud, Microsoft Azure, and VMware. My expertise spans containerization and orchestration technologies, as well as serverless architectures such as AWS Lambda. I possess deep knowledge in designing, deploying, managing, and monitoring cloud and virtualized infrastructures, supported by a strong understanding of established and emerging cloud management technologies. Additionally, I have solid knowledge of SDLC best practices, information security principles, and cloud-based data and analytics tools and workflows. I leverage these capabilities to build efficient, secure, and scalable systems that align with modern enterprise technology needs.

Experience

Safaricom PLC

Customer Support Specialist

February 2019 - Present (7 years 5 months)

I leverage service desk tools to troubleshoot system issues by analyzing logs and status reports. By proactively identifying customer pain points during onboarding and product usage, I simplify technical concepts to enhance understanding, address queries and complaints promptly, and coordinate with resolution teams to eliminate blockers and errors, ensuring complete customer satisfaction.

As a member of the product champions team, I foster effective communication and collaboration with colleagues across various teams. I contribute to building a customer-centric approach and participate in documenting incidents, customer-specific configurations, use cases, and product workflows.

Additionally, I collect customer feedback through in-person and virtual visits, identifying patterns and translating insights into actionable recommendations.

These efforts help refine procedures and processes, improving user experiences and ensuring that customers can seamlessly utilize our products and services.

Remote Executive Support Services

Digital Product Lead

March 2016 - December 2018 (2 years 10 months)

I worked closely with a high-performing team tasked with monitoring and reporting Google Data Analytics metrics. In this role, I built strong relationships with stakeholders across the organization, identifying opportunities to leverage company data for driving impactful business solutions.

I contributed to the creation of an effective communication plan and implemented a reporting system that streamlined communication between project teams and stakeholders, ensuring alignment and efficiency.

Furthermore, I led the ideation, development, and launch of digital content-driven products designed to boost market share within the department, specifically targeting low-value and inactive customers. This initiative successfully drove revenue growth. I consistently monitored the performance of digital projects, identified areas for enhancement, and proposed innovative ideas for new projects to maintain momentum and deliver value.

Education

University of Eldoret

Bachelor's degree, Mathematics and Statistics
